SCREENSHOTS OF THE SONARQUBE

The screenshot displays the CircleCI web interface. The top navigation bar includes the CircleCI logo and a status indicator 'OPERATIONAL'. The main header shows the breadcrumb path: Dashboard > Project > Branch > Workflow > Job. The job name is 'build (4)' and its status is 'Success'. A sidebar on the left lists navigation options: Organization Home, Pipelines, Projects, Deploys, Insights, Self-Hosted Runners, Organization Settings, and Plan. The main content area shows the job details for 'build', including its duration (4s / 12m ago), queued time (0s), executor (Docker / Large), branch (circleci-project-setup), and commit (c25706c). The job's author and message are 'Update config.yml'. Below this, the 'Steps' section is visible, showing two steps: 'Spin up environment' (3s) and 'Preparing environment variables' (0s), both of which are successful.

The screenshot shows the GitHub repository page for 'BankWebsiteInsys'. The repository is public and has 2 branches and 0 tags. The current branch is 'circleci-project-setup', which is 2 commits ahead of 'main'. The repository contains files: '.circleci', 'backend', 'frontend', and 'REFERENCE LIST.txt'. A recent commit 'ST10268411 Update config.yml' is shown with a status of 'All checks have passed' (2 successful checks). The checks include 'ci/circleci: build' and 'ci/circleci: sonarqube', both of which passed. The repository also has a 'README' file and a 'CONTRIBUTE' button. The right sidebar shows repository statistics: 0 stars, 0 forks, and 0 releases. The 'Languages' section shows a bar chart with JavaScript (67.3%), CSS (12.1%), and HTML (0.6%).

The screenshot shows the CircleCI web interface. On the left, a sidebar lists navigation options: Organization Home, Pipelines (selected), Projects, Deploys, Insights, Self-Hosted Runners, Organization Settings, and Plan. The main content area shows a pipeline for organization 'ST10268411'. A step named 'Spin up environment' is highlighted with a green checkmark and a '3s' duration. Below the step name, a terminal log displays the following output:

```
1 Using the v2 container runtime. For more details see: https://discuss.circleci.com/t/docker-ex
2 ecutur-infrastructure-upgrade/52282
3 docker-agent version: 1.0.51724-50938fb
4 task-agent version 1.0.297475-3bdadc3e
5 Downloading task-agent: success after 487.716676ms.
